

Policy on Supporting Pupils with Medical Conditions

"I was sick and you visited me." Matthew 25:36

At Crookham Infant School we aim to make learning irresistible so that as Team Crookham we all develop the life-long learning habits of resilience, resourcefulness, reflectiveness and reciprocity through exploring together the loving invitation of Jesus to 'live life in all its fullness' John 10:10.

Our vision stems from our Christian foundation and is firmly rooted in our values:

Love God, Love Others, Love Learning.

Introduction

Section 100 of The Children and Families Act 2014 places a duty on the governing body of this school to make arrangements for supporting children at their premises with medical conditions. The Department of Education have produced statutory guidance 'Supporting Pupils with Medical Conditions' and we will have regard to this guidance when meeting this requirement.

We will endeavour to ensure that children with medical conditions are properly supported so that they have full access to education, including school trips and physical education. The aim is to ensure that all children with medical conditions, in terms of both their physical and mental health, are properly supported in school so that they can play a full and active role in school life, remain healthy and achieve their academic potential.

It is our policy to ensure that all medical information will be treated confidentially by the Headteacher and staff. All administration of medicines is arranged and managed in accordance with the Supporting Pupils with Medical Needs document. All staff have a duty of care to follow and co-operate with the requirements of this policy.

Where children have a disability, the requirements of the Equality Act 2010 will apply.

Where children have an identified special need, the SEND Code of Practice will also apply.

We recognise that medical conditions may impact social and emotional development as well as having educational implications.

Key Roles & Responsibilities

The Governing Body - will make arrangements to support pupils with medical conditions in school to ensure that pupils with medical conditions are supported to enable the fullest participation possible in all aspects of school life. The Governing Body will ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions and are able to access information and other teaching support materials as needed.

The Headteacher - will ensure that this policy is developed and effectively implemented with partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation. The Headteacher will also ensure that all staff who need to know are aware of the child's condition. They should also ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations. This may involve recruiting a member of staff for this purpose. The Headteacher has overall responsibility for the development of individual healthcare plans and will also make sure that school staff are appropriately insured and are aware that they are insured to support pupils in this way. The Headteacher will contact the school nursing service in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.

Teachers and Support Staff - any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so. School staff will receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions. Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

School nurses - The school nursing services are responsible for notifying the school when a child has been identified as having a medical condition which will require support in school. Wherever possible, they should do this before the child starts at the school. The school nurse may support staff on implementing a child's individual healthcare plan and provide advice and liaison, for example on training.

Identifying children with health conditions

We will aim to identify children with medical needs on entry to the school by working in partnership with parents/carers and following the process outlined in the document 'Process for identifying children with a health condition' produced by the Southern Health School Nursing Team in conjunction with the Children's Services Health and Safety Team. We will use the 'Health Questionnaire for Schools' to obtain the information required for each child's medical needs to ensure that we have appropriate arrangements in place prior to the child commencing at the school to support them accordingly.

Where a formal diagnosis is awaited or is unclear, we will plan to implement arrangements to support the child, based on the current evidence available for their condition. We will ensure that every effort is made to involve some formal medical evidence and consultation with the parents.

Individual health care plans

We recognise that Individual Healthcare Plans are recommended in particular where conditions fluctuate or where there is a high risk that emergency intervention will be needed, and are likely to be helpful in the majority of other cases, especially where medical conditions are long term and complex. However, not all children will require one. The school, healthcare professional and parent will agree based on evidence when a healthcare plan would be inappropriate or disproportionate.

Where children require an individual healthcare plan it will be the responsibility of the Headteacher to work with parents and relevant healthcare professionals to write the plan.

A healthcare plan (and its review) may be initiated in consultation with the parent/carer, by a member of school staff or by a healthcare professional involved in providing care to the child. The Headteacher will work in partnership with the parents/carer, and a relevant healthcare professional e.g. school specialist or children's community nurse, who can best advise on the particular needs of the child to draw up and/or review the plan. Where a child has a special educational need identified in a statement or Educational Health Care (EHC) plan, the individual healthcare plan will be linked to or become part of that statement or EHC plan.

We may also refer to the flowchart contained within the document 'Process for identifying children with a health condition' for identifying and agreeing the support a child needs and then developing the individual healthcare plan.

We will use the individual healthcare plan template produced by the DfE to record the plan.

If a child is returning following a period of hospital education or alternative provision (including home tuition), we will work with Hampshire County Council and education providers to ensure that the individual healthcare plan identifies the support the child will need to reintegrate effectively.

All individual healthcare plans are reviewed at least annually or earlier if evidence is presented that the child's needs have changed.

When deciding what information should be recorded on individual healthcare plans, the governing body will refer to the Department of Education statutory guidance 'Supporting Pupils with Medical Conditions'.

Staff training

All new staff will be inducted on the policy when they join the school through the staff handbook.

All nominated staff will be provided awareness training on the school's policy for supporting children with medical conditions which will include what their role is in implementing the policy.

Where required we will work with the relevant healthcare professionals to identify and agree the type and level of training required and identify where the training can be obtained from. This will include ensuring that the training is sufficient to ensure staff are competent and confident in their ability to support children with medical conditions. The training will include preventative and emergency measures so that staff can recognise and act quickly when a problem occurs and therefore allow them to fulfil the requirements set out in the individual healthcare plan.

Any training undertaken will form part of the overall training plan for the school and refresher awareness training will be scheduled at appropriate intervals agreed with the relevant healthcare professional delivering the training.

A record will be kept to document the type of awareness training undertaken, the date of training and the competent professional providing the training.

The Child's role

Where possible and in discussion with parents, children that are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be recorded in their individual healthcare plan. The healthcare plan will reference what will happen should a child who self-administers refuse to take their medication (this will normally be informing the parent/carer at the earliest opportunity).

We will agree with relevant healthcare professionals/parent the appropriate level of supervision required and document this in their healthcare plan.

Managing medicines on School Premises

The administration of medicines is the overall responsibility of the parents/carers. Where clinically possible we will encourage parents to ask for medicines to be prescribed in dose frequencies which enable them to be taken outside of school hours. However, the Headteacher is responsible for ensuring children are supported with their medical needs whilst on site, therefore this may include managing medicines where it would be detrimental to a child's health or school attendance not to do so. We will not give prescription medicines to a child without their parent's/carers written consent (an 'Administration of Medicines/Treatment Form of Consent' form will be used to record this). If children can take their medicines themselves, staff may only need to supervise provided parental consent has been completed on this form.

Policy on Supporting Pupils with Medical Conditions

The Children's Service Medication tracking form is used to record all medicines received in and out of the premises.

The school will only accept medicines that have been prescribed by a doctor, dentist, nurse practitioner or pharmacist prescriber (for that child).

The name of the child, dose, expiry and shelf life dates and the record of prescribed medicines given to the child will be checked before medicines are administered.

On occasions where a child refuses to take their medication the parents will be informed at the earliest available opportunity.

We will only accept prescribed medicines that are in date, labelled, provided in the original container as dispensed by the pharmacist and include instructions for administration, their dosage and storage. Insulin is the exception, which must still be in date but will generally be available to schools inside an insulin pen or a pump, rather than its original container.

Responsibility for decision making about the administration of all non-prescribed medicines will always be at the discretion of the Headteacher who may decide to administer under certain exceptional circumstances.

Storage

Emergency medicines will be stored in a safe location, clearly marked with the child's name, but not locked away to ensure they are easily accessible in the case of an emergency.

Types of emergency medicines include:

- Injections of adrenaline for acute allergic reactions
- Inhalers for asthmatics
- Injections of Glucagon for diabetic hypoglycaemia

Controlled drugs will be securely stored in a non-portable container which only named staff will have access to. We will ensure that the drugs are easily accessible in an emergency situation. A record will be kept of any doses used and the amount of the controlled drug held in school.

All medication other than emergency medication will be stored safely in a locked cabinet, where the hinges cannot be easily tampered with and cannot be easily removed from the premise.

Where medicines need to be refrigerated, they will be stored in the staff room refrigerator in a clearly labelled container.

Policy on Supporting Pupils with Medical Conditions

Medicines such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available and not locked away. We will also ensure that they are readily available when outside of the school premises or on school trips.

Storage of medication whilst off site will be maintained at steady temperature so far as possible and secure. There will be appropriately trained staff present to administer day to day and emergency medication and copies of individual health care plans will be taken off site to ensure appropriate procedures are followed.

Disposal

It is the responsibility of the parents/carers to dispose of their child's medicines. It is our policy to return any medicines that are no longer required including those where the date has expired to the parents/carers.

If needles are required, sharps boxes will be in place for the disposal of needles.

Medical Accommodation

The Medical Room will be used for all medical administration/treatment purposes. The room will be made available when required.

Record keeping

A record of what has been administered including how much, when and by whom, will be recorded on a 'Record of prescribed medicines given to children in school' form. The form will be kept on file. Any possible side effects of the medication will also be noted and reported to the parent/carers.

Emergency Procedures

Where a child has an individual healthcare plan, this will clearly define what constitutes an emergency and provide a process to follow. All relevant staff will be made aware of the emergency symptoms and procedures. We will ensure other children in the school know what to do in the event of an emergency i.e. informing a teacher immediately if they are concerned about the health of another child.

Where a child is required to be taken to hospital, a member of staff will stay with the child until their parents arrives, this includes accompanying them to hospital by ambulance if necessary (taking any relevant medical information, care plans etc. that the school holds).

Day trips/off site activities

We will ensure that teachers are aware of how a child's medical condition will impact on their participation in any off site activity or day trip, but we will ensure that there is enough flexibility for all children to participate according to their own abilities within reasonable adjustments.

Policy on Supporting Pupils with Medical Conditions

We will consider what reasonable adjustments we might make to enable children with medical needs to participate fully and safely on visits. We will carry out a risk assessment so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. We will consult with parents and pupils and advice from the relevant healthcare professional to ensure that pupils can participate safely.

The school will consider if an additional supervisor (parent or member of staff) is needed to accompany a particular child with medical needs. Arrangements for taking any necessary medicines will also need to be taken into consideration. Staff supervising excursions should always be aware of any medical needs, and relevant emergency procedures. A copy of Individual health care plans (IHCPs) should be taken on visits in the event of the information being needed in an emergency. If staff are concerned about whether they can provide for a child's safety, or the safety of other children on a visit, they should seek parental views and medical advice from the school health service or the child's GP.

The procedure for administering medicines off site remains the same as if in school and a record must be kept of any medicines administered as if in school.

Unacceptable practice

Staff are expected to use their discretion and judge each child's individual healthcare plan on its merits, it is not generally acceptable practice to:

- prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- assume that every child with the same condition requires the same treatment;
- ignore the views of the child or their parents; or ignore medical evidence or opinion (although this may be challenged);
- send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- if the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable;
- penalise children for their attendance record if their absences are related to their medical condition, e.g. hospital appointments;
- prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;
- require parents to attend school as a matter of course to administer medication or provide regular medical support to their child, including with toileting issues. However, we expect parents to work with the school in meeting their child's need and this may on occasion require a parent attending school to resolve a health care issue or to provide comfort and reassurance to the child; or prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips

Liability and Indemnity

Staff at the school are indemnified under the County Council self-insurance arrangements. The County Council is self-insured and have extended this self-insurance to indemnify school staff who have agreed to administer medication or undertake a medical procedure to children. To meet the requirements of the indemnification, we will ensure that staff at the school have parents' permission for administering medicines and members of staff have had training on the administration of the medication or medical procedure.

Complaints

Should parents or children be dissatisfied with the support provided they can discuss their concerns directly with the Headteacher. If for whatever reason this does not resolve the issue, they may make a formal complaint via the school's complaints procedure.

Confidentiality

The Headteacher and staff should always treat medical information confidentially. The head should agree with parents, who else should have access to records and other information about a child. If information is withheld from staff they should not generally be held responsible if they act incorrectly in giving medical assistance but otherwise reasonably and in good faith.
